Professional Summary

AI/ML-focused Software Engineer with 2+ years of internship experience building NLP pipelines, ML systems, and full-stack SaaS platforms. Proficient in Python, TensorFlow, and cloud-native deployment with hands-on experience in LLMs, RAG architectures, and MLOps. Seeking entry-level AI/ML Engineering roles.

Education

Mahindra University
B.Tech in Computer Science

Aug 2022 – Jul 2026
Hyderabad, India

– **Coursework:** Machine Learning, Deep Learning, Applied AI in Industry, Reinforcement Learning, DBMS, Operating Systems, OOP

Experience

VTAG Software
AI/Full-Stack Intern – Python, SQL, Angular, AWS

Jan 2026 – Present
Hyderabad, India

- Built a full-stack property management platform (buy/sell/rent/maintenance) using Python, Angular, MySQL, and AWS.
- Developed a CRM module managing leads, inquiries, agent follow-ups, and tenant tracking, improving sales pipeline visibility.
- Implemented RESTful APIs with role-based authentication and optimized MySQL queries on AWS EC2 for production use.

EASYWAY Technologies Pvt. Ltd.
AI/Full-Stack Intern – Python, Flask, SQL, NLP, Redis, CI/CD

Jun 2025 – Aug 2025
Hyderabad, India

- Engineered a multi-tenant SaaS dashboard using Flask and SQLAlchemy, reducing data latency by 40% across clients.
- Designed an NLP-driven document parsing pipeline for SQL schema ingestion, achieving 93%+ extraction accuracy.
- Reduced DB query times by 67% via indexing, query profiling, and Redis caching; built GitHub Actions CI/CD for Dockerized environments.

Corizo
Machine Learning Intern – Python, Scikit-learn

Jun 2022 – Aug 2022
Remote

- Built 6+ ML models (SVM, Random Forest, kNN) achieving 88–94% accuracy via hyperparameter tuning; top 5% of 500+ global interns.
- Developed a SaaS analytics pipeline for real-time insights, reducing dashboard lag by 50%.

Projects

BrikBond – Post-Sales CRM for Real Estate (Full-Stack)

Jan 2026 – Present

- Architected a production-grade, role-based CRM for post-sales real estate lifecycle management – bookings, legal docs, payments, and customer self-service – deployed on AWS EC2 at brikbond.com.
- Built RSA-256 asymmetric JWT auth with HttpOnly cookies, silent refresh, 5-attempt auto-blocking, and role-based route guards across Angular and Flask.
- Engineered automated demand notice generation: python-docx templates converted to PDF via LibreOffice, uploaded to S3, emailed asynchronously; private S3 architecture with presigned URLs and AWS Secrets Manager.

RAG-Based Document Intelligence System

Jan 2025 – Mar 2025

- Built an end-to-end RAG pipeline using LangChain and OpenAI API with FAISS vector store; achieved sub-2s retrieval latency on 10k+ document pages.
- Deployed as a FastAPI REST service on AWS EC2 with token-usage tracking and response caching, reducing API costs by 35%.

Property Price Prediction – End-to-End ML Pipeline

Nov 2024 – Jan 2025

- Built a regression pipeline (Random Forest, XGBoost, Ridge) on a 20k+ record dataset; achieved 31% RMSE reduction via feature engineering and hyperparameter tuning.
- Engineered 15+ domain features with Pandas and NumPy; applied SHAP values to identify top price drivers; deployed as Flask REST API on AWS EC2.

Technical Skills

ML/AI: PyTorch, TensorFlow, Scikit-learn, HuggingFace, LangChain, FAISS, NumPy, Pandas, OpenCV
Backend/APIs: Python, Flask, FastAPI, SQLAlchemy, REST APIs, Redis, MySQL, PostgreSQL, Angular
DevOps/Cloud: Docker, GitHub Actions, AWS EC2, Prometheus, Grafana, CI/CD, Jupyter
Languages: Python, SQL, Java, C

Achievements

- Top 5% globally in Corizo Data Science internship cohort of 500+ participants (2022).
- National Level Science Olympiad Finalist – ranked among top performers nationally.
- Organising Committee Member, Lincoln Labs – physics-focused college club; co-led lab events, workshops, and technical sessions.
